(a) tight, ρ_{tr} = 4 kW per charger
(b) moderate, ρ_{tr} = 7 kW per charger
(c) tight, ρ_{tr} = 4 kW per charger
(d) moderate, ρ_{tr} = 7 kW per charger
training sizes
Optimality gap (€ per charger and episode)
Penalised profit J^{pen} (€ per charger and episode)
Station size N (chargers)
SA-Attn (ours)
Deep Sets+safety layer
SA-Attn trained at N = 50 (reference)
Attention+safety layer without departure bound
Attention+penalty
Price-threshold+safety layer
ALAP+safety layer
AFAP+safety layer
